Anna Niggas

Anna works at the Institute of Applied Physics at TU Wien, where she studies the interaction of (highly charged) ions and electrons with surfaces and two-dimensional materials. She completed her PhD at TU Wien in 2023 with a dissertation awarded an honorary prize by the Austrian federal president (sub Auspiciis Praesidentis). Her research has led to several peer-reviewed publications and contributions to international conferences. Anna has received recognition for her work, including the Sheldon Datz Prize (ICPEAC 2023), the Loschmidt Prize from the Austrian Chemical-Physical Society, and the Hannspeter Winter Prize from TU Wien.
